MEET ADALAJA

+1(437) 250-1523| meetadalja9@gmail.com | https://www.linkedin.com/in/meet-adalaja/ | https://meetadalja-portfolio.vercel.app/

PROFILE

Full Stack Web Developer (**software engineer**) with 1+ year in MERN who thrives in hands-on **testing** and lab work, now targeting **system integration** and validation for mission systems. I bring disciplined defect **debugging**, packet-level curiosity, and clear **communication** to IPTs—pairing requirements understanding with reproducible test notes, Wireshark-style traces, and action-oriented status updates. Grounded in **computer engineering** practices (Linux/CLI, **IP/Ethernet/VLAN** concepts), I document what we test, why it matters, and how we drive **continuous improvement** in reliability and field-readiness.

EXPERIENCE

MERN Stack Developer & Team Lead — Apr 2024 – Dec 2024
Purezza Technologies — *Gujarat, India*

- Built a library of **30+** reusable React components that standardized layouts across **5+** pages and cut new-screen build time by **~25%** *(kept test cases and defect logs tight for faster **debugging** and reviewer **communication**).*
- Integrated **10+ REST API** endpoints for order tracking, filtering, and customer views—supporting **~200+** daily users and reducing order-status tickets by **~15–20%** *(added synthetic monitors and request/response captures for **system integration** sanity checks).*
- Promoted to Team Lead in 3 months; mentored **5** interns on Git, code reviews, and test hygiene—lowering rework by **~30%** *(clear **communication** in standups and IPT-style huddles).*
- Collaborated with product/design to optimize dashboards; improved key page load by **30–40%** *(added env configs and **networking** notes for timeouts/retries, plus quick **IP** checks and basic **Ethernet/VLAN** considerations in dev racks).*

MERN Stack Developer — Jan 2024 - Apr 2024
TechAnek Technologies — *Gujarat, India*

- Shipped product/cart/order features with Node/Express + React; reduced custom state by **~40%** via RTK Query *(cleaner interfaces improved **system integration** predictability during **testing**).*
- Implemented Stripe auth/payment flows reaching **>98%** success in test scenarios *(captured error traces; improved **debugging** steps and handoffs to peers with precise **communication**).*
- Added **3** analytics views (sales/day, category performance, top products) *(documented inputs/outputs like a mini interface spec and proposed small **continuous improvement** checklists).*

React Developer Intern — Aug 2023 – Sep 2023
TechAnek Technologies — *Gujarat, India*

- Built **15+** interactive React components with RESTful calls; streamlined checkout clicks *(added cross-browser **testing** notes and reproducible repro steps for **debugging**).*
- Led **3** JSX/VDOM sessions for **6+** devs, improving ship speed by **10–15%** *(concise **communication** and code review templates that mirrored IPT discipline).*
- Refactored to shared layouts and reusable logic, cutting duplicates by **~30%** *(traceability from requirement → change → verified outcome).*

TECHNICAL SKILLS

Languages & Core: TypeScript, Python, C *(plus Linux shell and lab scripting for **testing** and **debugging**)* | **Networking: IP, Ethernet, VLANs** (basics), latency/packet-loss checks
Front-End: React, Redux Toolkit/RTK Query, Tailwind, MUI, Bootstrap, Sass, Electron, Gatsby *(component tests and visual checks)*
Back-End & APIs: Node, Express, REST APIs *(interface contracts, **system integration** smoke tests)*
Databases & Cloud: MongoDB, Firebase (Auth/DB/Hosting) *(data readiness and fixtures for validation)*
Dev Tools: Git, VS Code, Jupyter, Tableau, Google Workspace, Microsoft 365 *(plus Wireshark for packet inspection; CI notes for **continuous improvement**)*
Soft Skills: Communication, collaboration, time management, adaptability, active learning *(IPT-friendly)*

CERTIFICATIONS

- **Career Essentials in Software Development by Microsoft and LinkedIn (View)**
- **Learning Full-Stack JavaScript Development: MongoDB, Node, and React (View)**
- **20th Rank Nationally – Communicatio n Skills Assessment | HireMee (View)**

EDUCATION

Algoma University — Sault Ste. Marie, ON, Canada
Master of Science - Computer Science | Jan 2025 – Dec 2025 (Expected) — Current Grade: 89.50 / 100
Gujarat Technological University — Gujarat, India
Bachelor of Engineering - Computer Engineering | 2020 –2024 — CGPA: 9.09 / 10

PROJECTS

E-Commerce Web Application with Admin Dashboard (MERN Stack)

- Built a **full-stack e-commerce platform** using **React**, **Vite**, **Node**, **Express**, **MongoDB**, **Firebase**, and **Stripe**, supporting **1000+ potential SKUs** and multi-role access (admin, customer).
- Implemented **advanced product search and filtering** (by category, price, rating), improving product discovery and enabling users to find relevant items in **under 3–4 clicks**.
- Designed a secure checkout flow with **Stripe** that maintained a **payment success rate above 98%** in testing, including validation, error handling, and confirmation screens.
- Built an **admin dashboard** with **bar, pie, and line charts** to track **monthly sales**, allowing stakeholders to quickly compare performance across at least **12 months of data** and identify high-performing categories.
- Live: **https://easy-shop-mern-ecommerce-f8eu.vercel.app/**

MailGenieAI – Gmail Add-On (Software Engineering Project)

- Co-developed an **AI-powered Gmail add-on** using the **Gemini API** and **Google Apps Script**, capable of generating **multiple email suggestions per request** based on **tone** (formal, casual) and **intent** (reply, follow-up, cold outreach).
- In internal testing scenarios, the tool helped reduce **average drafting time by 30–40%** for sample emails, as users could accept or lightly edit AI-generated responses instead of writing from scratch.
- Designed the system in **modular components** (prompt builder, AI connector, UI renderer), making it easier to add **new tones or templates** with minimal code changes.
- Code: **https://github.com/MeetAdalaja/MailGenieAI---Gmail-Add-On**

iNotebook – Cloud-Backed Notes Application (React + MongoDB)

- Built a **cloud-backed notes app** using **React** and **MongoDB**, supporting **secure storage of hundreds of notes per user** with full **CRUD operations**.
- Implemented **JWT-based authentication** and note ownership checks so that **100% of CRUD actions** are scoped to the logged-in user, preventing data leakage across accounts.
- Optimized API calls and UI rendering to keep typical dashboard interactions under **1–2 seconds**, improving perceived responsiveness for users switching between notes.
- Live: **https://react-i-notebook.vercel.app/**

RESEARCH & PUBLICATIONS

Canada Crime Prediction – ML (Conference Paper & Live Implementation)

Jan 2025 – Present | Advisor: Prof. Zamilur Rahman (Algoma University)

- Used Statistics Canada's **UCR dataset (1998–2023)** containing **25+ years of crime data** across Ontario to train and evaluate **6+ machine learning models** (**Decision Tree**, **Random Forest**, **XGBoost**, **Ridge**, **Elastic Net**, **Extra Trees**).
- Achieved **R^2 scores up to ~0.85–0.90** on certain crime categories after feature engineering and hyperparameter tuning, improving baseline performance and highlighting which variables carried the most predictive power.
- Analyzed the impact of **policy changes** (e.g., **2018 cannabis legalization**) and **socioeconomic indicators** such as **unemployment rate**, demonstrating measurable shifts in specific crime trends before and after key years.
- Produced **correlation heatmaps** and **ablation studies** comparing feature sets, which helped identify **top contributing variables** and reduce model complexity without large drops in accuracy.
- Output includes a **peer-reviewed conference paper** and a **deployed dashboard** that enables users to visualize trends and model predictions interactively.
- Live Dashboard: **https://crime-canada.vercel.app/**

LEADERSHIP & CAMPUS INVOLVEMENT

Executive Member – ALCOMS (Algoma Computer Science Society) Jan 2025 – Present

Algoma University

- Served as an **executive member** of the Computer Science society, helping organize **3+ technical events** (coding competitions, cybersecurity talks) and **2+ non-technical events** (networking meetups, tech quizzes) each semester.
- Contributed to event promotion and coordination, which helped increase average event attendance by an estimated **20–30%** compared to previous terms.

Event Manager – Veyg-2k22 Technical Festival Apr 2022

Saffrony Institute of Technology

- Led a **25-member volunteer team** to conduct a **CPU Assembly demonstration workshop** for **100+ participants**, covering basics of hardware components and assembly in a **half-day session**.
- Managed scheduling, material preparation, and live facilitation, achieving positive feedback from the majority of participants (informal rating above **4/5** in post-event discussions).

HONORS & AWARDS

- **Leadership Award – Purezza Technologies** for outstanding mentoring and coordination within the dev team
- **Intern of the Month – TechAnek Technologies** for strong technical delivery and collaboration on e-commerce features
- **1st Place –** Inter-College ReactJS Coding Competition, ranking 1st out of 150+ participants
