MEET ADALAJA

Full Stack Developer | Software Developer

+1 (437) 250-1523 | meetadalja9@gmail.com | https://www.linkedin.com/in/meet-adalaja/ | Portfolio | GitHub | LeetCode

Play Intro

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, Python, Java, OOP, DSA
Front-End: React (Hooks, Router) | Angular | Redux Toolkit/RTK Query | Next.js | TailwindCSS | Material UI | Responsiveness
Back-End & APIs: Node.js (Express, NestJS) | REST APIs | JWT Auth | RBAC | TypeORM | Swagger/OpenAPI | GraphQL | Webhooks | Error handling
Databases & Testing: PostgreSQL/MySQL | MongoDB | Redis | Jest | Supertest | Query optimization | Migrations
Tools/Cloud: Git/GitHub | PR code reviews | CI/CD (Jenkins, GitHub Actions) | Linux | Docker | Kubernetes | Terraform | AWS/Azure DevOps | Vercel/Render | Firebase | Stripe | Jira/Confluence | Agile

WORK EXPERIENCE

Full Stack Developer & Team Lead — **April 2024 - December 2024**
Purezza Technologies — *India*

- **Promoted to Team Lead in 3 months** by owning sprint planning, epic breakdown, and PR standards; mentored **5 interns** and coached a **6+ developer team**, reducing rework by **~30%** via faster feedback and definition of done.
- **Boosted business outcomes** by optimizing cart/checkout/order tracking; handled **200+ daily users**, reduced order-status queries by **~35/month**, and added **~50 checkouts/month**, driving **$ ~180K** in annualized impact via clearer UX and messaging.
- **Delivered 30-40% faster dashboards** by profiling UI/API/database; leveraged Linux, logs, monitoring, and tracing to isolate root causes, brought **p95 latency from 2.2s to 1.2s**, and reduced **MTTR by 45%** with runbooks.
- **Secured APIs** with **JWT** and **RBAC**, standardized validation and error contracts, and published **Swagger/OpenAPI**; secured webhooks with signatures, idempotency keys, and retries, driving down integration failures from **20/month to 9/month**.
- **Raised release reliability** with **CI/CD** (Jenkins, GitHub Actions), **Docker**, and env parity; ran controlled rollouts on **AWS/Azure** DevOps, decreasing failures from **8/qtr to 4/qtr** and rollback time from **25 min to 10 min**.

Full Stack Developer — **September 2023 - April 2024**
TechAnek Technologies — *India*

- **Accelerated delivery time by ~25%** by shipping **30+ React/Next.js** components across 5+ views in **TypeScript**; strengthened accessibility and trimmed UI bugs by **28%** with responsive, cross-browser UI.
- **Minimized custom state code by 120 LOC** by strengthening **Redux Toolkit/RTK Query** with caching, deduplication, invalidation; eliminated API calls from **20/session to 11/session**, lowered regressions, and kept contracts strongly typed.
- **Scaled backend** with **100+ REST** endpoints in **Node.js (Express/NestJS)** using validation and **MongoDB**; raised API success to **99.4%**, decreased avg latency by **22%**, and hardened edge cases.
- **Elevated release quality** with **Jest** and **Supertest** for auth/orders/reporting; lowered repeat defects from **10/sprint to 6/sprint** and shortened QA from **4 days to 3 days**.
- **Sped up insights and fixes** by tuning **SQL (PostgreSQL/MySQL)** and running **TypeORM migrations**; cut query time **from 1.8s to 320ms** and data incidents by **40%**.

MERN/MEAN Developer Intern — **August 2022 - September 2023**
TechAnek Technologies — *India*

- **Built and released MERN/MEAN features** by building **React/Angular** screens and **Node.js** services with **MongoDB**; handled **~55 more req/min**, minimized handoffs via docs, and owned releases via **Git/PRs**.
- **Increased backend reliability** by tightening validation/errors/pagination and adding **Redis**; decreased DB load by **35%**, improved p95 by **28%**, and added structured logs/dashboards for faster debugging.
- **Expanded API maturity** via **Swagger/OpenAPI**, integration tests, and webhooks; achieved integration success **98.7%**, lowered manual reconciliation **45%**, and deployed safely with CI and code reviews.

React Developer Intern — **May 2022 - August 2022**
InfoLabz — *India*

- **Implemented responsive, accessible React UI** in JavaScript (ES6+) and HTML5/CSS3 with reusable patterns; upgraded mobile usability, reduced UI defects **26%**, and introduced stable loading/empty/error states for data-driven pages.

PROJECTS

Multi-Tenant RBAC Task Management Board (Website) (Source Code) — *Angular, NestJS, TypeORM, JWT, REST*

- Developed a multi-tenant Angular + NestJS task board with **5-level RBAC** (Owner to Viewer) across **20+** secured APIs and seeded **3+ orgs** and **10+ users** (including multi-org membership), shrinking RBAC demo/setup by **60-70%**.

MailGenieAI - Gmail Add-On (Source Code) — *Gemini API, Google Apps Script, AI*

- Built Gmail add-on (**Gemini API**, **Apps Script**); shortened drafting time by **60%** (repeatable config, validated outputs, **GitHub** releases).

Canada Crime Forecasting - ML Pipeline (Website) (Source Code) — *Python, FastAPI, pandas, scikit-learn, ML*

- Built **Python** Canada crime ML forecasts; cut data **1M+ to 306k** and enhanced drug predictions with **2018** legalization signal.

EDUCATION

M.Sc. Computer Science, Algoma University | **GPA: 3.9/4.0** — Jan 2025 - Dec 2025
B.E. Computer Engineering, Gujarat Technological University | **GPA: 3.6/4.0** — Oct 2020 - Jul 2024
